## comments

Each line corresponds to a student's answer		
strengths	aspects to be improved	comments, clarifications, suggestions
the course is interactive and the slides are amazing		
slides are great and the course interesting		
The strong structure of the course and the amount of resources provided	None	
motivation du prof	définir clairement les objectifs du projet, les exemples étaient peut-être trop poussé, car au niveau du temps on est court je trouve. On peut se perdre facilement heureusement que le prof était attentif à nos questions.	
The tools that provided us are helpful for understanding not just practical exercises but theory		
I like that it is project-based and it allows to gain hands-on experience		
	The classe schedule is too short, why it is only during one half semester ?	
Clear and well structured		
He is taking to explain everything and make sure that everyone understand everything correctly	Nothing	
Bonne structure du cours et facilité d'apprentissage grâce à cela	Aucun	
I really appreciated this teaching. The professor made the subject engaging and easy to follow, even when the topics were challenging. Their explanations were clear, and they always took time to make sure everyone understood. It was a very positive and motivating learning experience.	Everything was clear, but maybe the course could include a few more concrete examples or exercises to apply the theory.	no more comments
Le professeur aime son travail , de cette façon il nous donne envie de travailler dans sa matière		
practice coding and presentation skills		
Well-structured teaching material and a teacher who is passionate about his subject
